

WHITE PAPER OF THE GODFATHER DOGE

ABOUT

The Godfather Doge, who wants to take its place in the hype consisted of the doge tokens which has been coming out one after another, will be the one who is the most wise, most reliable, honest and helpful by emphasizing the fact that he's the smartest and the most bossy of the family among the dozens of doges that has already been and will be launched, and also as the doge with the most planned roadmap.

It will be a doge token that aims to build an empire step by step, just like the Godfather Don Vito Carleone.

It will gather all its investors under the same roof and will open its doors to other investors after gaining the trust of its initial investors and making them earn first.

In addition to honesty is essential for The Godfather Doge, it has also determined a charity plan that will enable it to be there for every living thing that really needs it unlike other doges.

DESCRIPTION

Omertà.. The code of silence that exists in the gangland. Members of the family have so far entered the crypto world with permission of The Godfather. They all grew up and developed, then became the leaders of their own realms by courtesy of The Godfather Doge. Our little brother Dogecoin who stepped into the industry first, got permission from The Godfather Doge before every move he made, and he always did so by being faithful to Omertà.

But lately, The Godfather has seen his family get too involved in the business; has heard that the code of silence was broken now and then, and finally decided to teach a lesson to the younger sibling of the family by stepping into the crypto world.

It's time for The Godfather Doge! The eldest and the strongest of the family is now in the crypto market and ready to regulate the family. He has come to show the younger members of the family who is the eldest once again.

CHARITY

All the tokens that have been launched to date have prepared many charity plans, but all these tokens have always focused on one thing. We, as The Godfather Doge, aim to be with all kinds of people and animals in need. If people document the goodness done to us with a video, they will be eligible to participate in the lottery and \$TGDOGE will be airdropped to the winners as a result of the lottery.

The details of Charity as follows;

We will burn half of the total of the transaction fee received in the marketing wallet at the end of the week,

Distribute the other half to 10 people who sent us a goodness video.

AIMS

- 1. Proving being the eldest of the family to the younger siblings once again.**
- 2. Reminding Omertà to everyone by regulating the family over again.**
- 3. To be able to give the most profit to all our investors as the eldest member of the family.**
- 4. Reminding the Dogecoin of its place by entering CMC and Coin Gecko at first, and then major stock markets.**
- 5. Showing that the Godfather ecole is not dead by helping everyone in need around and creating a tremendous impression all over the world by starting a charity chain.**

TOKENOMICS

What makes The Godfather Doge (\$TGDOGE) unique from other tokens? All other tokens associated with Dogecoin have either no real purposes or fail to provide enough security for their holders. This makes us the first rugpull-proof token to be a member of the Doge family that maintains the theme of “generosity” to all charities around the world.

We burn tokens to increase the value of each holders' tokens. We have also calibrated the tokenomics carefully to ensure sustainability.

How is it going to be made ?

- 4% distributed amongst holders and for token sustainability.

We reward every Godfather a generous portion of 4% for every single transaction made on the exchange. This way holders can earn passively every time someone buys or sells. All you need to do is hold your tokens and watch them grow!

- 4% directly added to the Liquidity pool

This is critical to maintain the healthy Liquidity Pool / Market cap ratio

- 2% towards our donation wallet for charity

An incredible 2% of every single transaction goes to putting food on someone's plate, or a roof over an entire family. This is sent directly to our charity wallet to be used for donations across various charitable organizations.
